

# How Safe Are Your Drivers?

Distracted driving can be extremely costly, and it happens too often to take any chances.

Estimated annual cost of distracted driving:  
**\$129 Billion**

**65%** of drivers would turn around to get their phone if they realize they didn't have it.

**59%** of drivers would make or answer a call due to pressure from family.

**46%** of drivers would read or send emails due to work demands.

**32%** of drivers think they can use their phone safely while driving.

**60%** of drivers would need to be involved in a fatal accident to be dissuaded from using technology while driving.
